

Glenn Paul Sumido

LEAD FRONTEND DEVELOPER

Toronto, ON, Canada · 613-700-7474 · psumido@gmail.com · linkedin.com/in/paulsumido · github.com/gpbsumido · paulsumido.com

SUMMARY

Frontend engineer with **9+ years** building scalable, data-intensive web applications in **React & TypeScript**. Frontend lead on enterprise SaaS products — from **conversational AI interfaces** and complex data-visualization dashboards to reusable **design systems** spanning React and Angular. Deep focus on performance, automated testing, accessibility, and turning ambiguous product goals into polished, production-ready experiences alongside designers and product owners.

SKILLS

Languages	TypeScript, JavaScript (ES2023), HTML5, CSS3 / Sass, Python, SQL
Frameworks & UI	React 19, Next.js, Angular 21 (signals, zoneless, SSR), Redux, Zustand, TanStack Query, MUI, Tailwind CSS, Framer Motion, GSAP
Design Systems	Design tokens, CSS custom properties, component library architecture, Figma, WCAG accessibility
Data & Visualization	ECharts, Recharts, Chart.js, Three.js / React Three Fiber, MapLibre / Leaflet
APIs & Data	REST, GraphQL, Zod validation, Auth0, BFF auth pattern, Node.js / Express, PostgreSQL
Testing	Vitest, Jest, React Testing Library, MSW, Playwright, Cypress, mutation testing
Tooling & Infra	Docker, AWS (S3), Vercel, Railway, CI/CD, real-user Core Web Vitals monitoring

EXPERIENCE

Helika — Senior Software Developer (Frontend Lead)

Jun 2023 – Feb 2026

Web3 gaming-analytics SaaS · Calgary (Remote)

- Led frontend development of an enterprise gaming-analytics SaaS platform, owning complex, data-heavy visualization interfaces built with **React, TypeScript, and Redux**.
- Designed and shipped **Helika AI**, a production conversational analytics assistant real clients use to query game data in natural language and receive live, interactive artifacts — charts, dashboards, leaderboards, and config changes — rendered inline in chat.
- Architected the chat around a **decoupled controller/state-machine**, allowing the UI to swap a single chat endpoint for a session-scoped multi-agent backend without a rewrite.
- Owned frontend delivery through multiple **fundraising rounds**, shipping investor-facing features and pixel-perfect UI from Figma that supported key company milestones.
- Hardened the product for real users with response streaming, Auth0 authentication, Sentry error monitoring, and continuous performance and reliability improvements.

Refmint — Front End Developer

Feb 2022 – Jun 2023

Vancouver (Remote)

- Designed and built data-heavy React applications with a strong focus on performance, **improving page load times ~40%** through lazy loading and caching strategies.
- Built and maintained a **reusable UI component library** shared across internal and customer-facing applications.
- Streamlined deployments with automated CI/CD build pipelines and continuous integration.

PeopleInsight — Data Scientist / Front-End Developer

Apr 2017 – Jan 2022

Enterprise HR analytics · Ottawa

- Built interactive **dashboards for enterprise HR analytics** in React, partnering with UX designers to translate complex requirements into intuitive interfaces.
- Developed survey-driven data-collection workflows with validation logic and automated testing.
- Implemented automated data-processing pipelines that reduced manual effort and improved data quality.

SELECTED PROJECTS

- Paul Design System** — Framework-agnostic design system: design tokens compiled to CSS custom properties, powering first-class **React (10 components)** and **Angular (16 standalone components)** libraries in a monorepo.
- paulsumido.com (live)** — Next.js portfolio with a **BFF auth pattern** (no tokens exposed to the browser) and a **real-user Core Web Vitals pipeline** reporting P75 by route and release; optimistic updates verified with mid-flight MSW assertions.
- angular-paul** — A macOS-style desktop-OS portfolio in **Angular 21** using standalone components, signals, zoneless change detection, and SSR with incremental hydration.

EDUCATION

Bachelor of Engineering — Communications Engineering

Carleton University, Ottawa

2013 – 2018
